EDUCATION

Technical University of Berlin | 2025–Present

Master of Science in Information Systems Management (Wirtschaftsinformatik)

LUISS Guido Carli | 2022–2025

Bachelor of Science in Management and Computer Science

- Grade: 110L
- GPA: 28.47/30
- Final Thesis: A Time Series-Based Sentiment Analysis of Media Perception of A.I.

PROFESSIONAL EXPERIENCE

Private Tutor (Python Programming) | Oct 2023 – Present

Freelance | Rome, Italy (Remote)

- Delivered one-on-one tutoring to junior university and high school students, helping them progress from no prior knowledge to beginner-level proficiency in Python
- Covered programming fundamentals (loops, functions, data structures) and advanced topics such as Pandas and NumPy for data exploration
- Designed tailored lesson plans that combined theory and practice, enabling students to achieve strong academic results

TEDxYouth Communications, Editorial and Marketing Director | Jun 2021 – Dec 2021

Wockhardt Global School | Aurangabad, Maharashtra, India

- Directed editorial and marketing efforts for TEDxYouth events, managing communications strategy and outreach
- Utilised Google Analytics and Microsoft Excel to track engagement and optimise campaign performance
- Collaborated with cross-functional teams to deliver impactful content and ensure event success

RELEVANT PROJECTS

Airbnb Market Analyser – Data-Driven Pricing Tool

SQL, Streamlit | 2025

- Built a data-driven analysis tool to help Airbnb hosts in Berlin set competitive prices and identify high-performing areas by designing SQL queries to analyse revenue by neighbourhood, price distributions, review trends, and property categories
- Developed an interactive Streamlit dashboard for real-time market exploration, enabling hosts to visualise trends and benchmark pricing strategies
- Delivered a practical solution that combines quantitative market research with user-friendly insights for better decision-making

Why Do Credit Card Customers Leave? – Predicting Churn with Data

R, Data Analytics | 2024

- Analyzed real-world banking and purchase datasets to predict customer churn and identify at-risk accounts

- Cleaned and preprocessed data using KNN imputation, categorical encoding, scaling, and class balancing to improve model accuracy
- Built churn prediction models in R, testing multiple approaches to evaluate predictive performance
- Discovered customer behavior (e.g., transaction frequency, credit usage) was more predictive of churn than demographics, providing actionable insights for banks' retention strategies

Data-Driven CRM Analytics – Boosting Summer Campaign ROI

KNIME, XGBoost, Power BI, GenAI | 2025

- Analyzed historical campaign data for Company X to optimize marketing investments across 290+ stores
- Applied feature selection in KNIME and tested multiple models, with XGBoost achieving 94% prediction accuracy
- Designed an Expected Profit model (€246K vs. €15K baseline), balancing risk vs. reward for campaign targeting
- Built Power BI dashboards to visualize geographic and demographic store trends, guiding data-driven decision-making

PUBLICATIONS & FINAL THESIS

Bachelor's Thesis – Artificial Intelligence in the News (2013–2024)

LUISS Guido Carli University | Grade: 110 e Lode

- Collected and analysed thousands of New York Times articles to track shifts in media sentiment toward AI over a decade
- Applied RoBERTa NLP models for sentiment analysis (optimism, fear, neutrality) and XGBoost for time series forecasting
- Forecasted sentiment trends for 2025–2030, highlighting how public discourse adapts as AI adoption matures

Published Research – Generational Dynamics in the Marketing Funnel

International Journal of Novel Research and Development (IJNRD), [Vol. 8, Issue 8](#) | Aug 2023

- Co-authored a peer-reviewed research paper analyzing how different generations engage with stages of the marketing funnel (Awareness, Consideration, Conversion, Loyalty)
- Conducted survey-based data collection and statistical correlation analysis to uncover generational differences in consumer behavior
